Introduction :-

The modern Olympic Games (or) Olympics are leading international sporting events featuring summer and winter sports competitions in which thousands of athletes from around the world participate in a variety of competitions.

The Olympic Games are considered the World's foremost sports competition with more than 200 nations participating. The Olympic Games are held every four years, with the Summer and Winter Games alternating by occurring every four years but two years apart.

Overview :-

The evolution of the Olympic Movement during the 20th and 21st Centuries has resulted in several changes to the Olympic Games. Some of these adjustments include the creation of the Winter Olympic Games for snow & ice sports, the Paralympic Games for athletes with a disability, the Youth Olympic Games for athletes aged 14 to 18, the five Continental games [Pan American, African, Asian, European, and Pacific] and the World Games for sports that are not contested in the Olympic Games. The Deaflympics and Special Olympics are also endorsed by the IOC. The IOC has to adapt to a variety of economic, political and technological advancements. As a result, the Olympics has shifted away from pure amateurism, as envisioned by Coubertin, to allowing participation of professional athletes.

The growing importance of mass media created the issue of corporate sponsorship and commercialisation of the Games. World wars led to the cancellation of the 1916, 1940 and 1944 Games. Large boycotts during the Cold War limited Participation in the 1980 and 1984 Games. The latter, however, attracted 140 National Olympic Committees, which was a record at the time.

The total number of events in Olympic is 339 in 33 sports. And for every event there are winners. Therefore various data is generated. So, by using Cognos Analytics we will analyze this data and find the insights.

Advantages :-

1. International Exposure :- Participation in the olympic provides athletes with a global platform to showcase their skills and abilities. This exposure can lead to sponsorships.
2. Prestige and Honor :- The olympics are among the most prestigious and respected sporting events globally. Being an olympian carries a significant amount of honor and respect.
3. Achieving personal goals :- For many athletes, competing in the olympics is a life long dream and a significant personal achievement.
4. Cultural exchange :- Athletes have the opportunity to interact with and learn from people from diverse cultural backgrounds.
5. Inspiration for others :- olympics athletes often serve as role models and inspire others to pursue sports.
6. Training and Support :- Athletes benefit from world-class training facilities, coaches, and financial support from their national olympic committees.

Disadvantages:-

1. Intense pressure:-

The pressure to perform at the highest level in the olympics can be overwhelming. This can lead to stress, anxiety and burnout.

2. Injury Risk:-

The intense training and competition schedules in olympic sports can increase the risk of injuries, some of which may be career-ending.

3. Financial Strain:-

Many athletes struggle financially, as they may have to fund their own training and travel expenses.

4. Short Career Span:-

In many olympic sports, an athlete's career peak is short-lived, and they may have to transition to other careers relatively early in life.

5. Political and Administrative Issues:-

The olympics can become embroiled in political controversies and athletes may find themselves caught in disputes not of their making.

Result :-

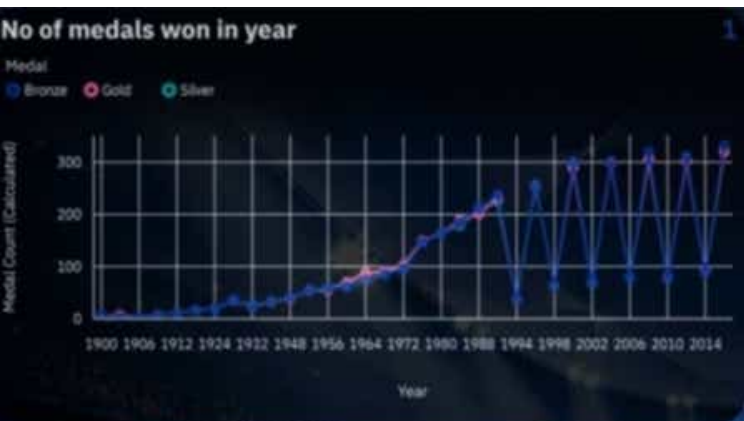

A virtual internship is a work experience placement that students can do and from home during the internship. I communicated with instructor through a range of resources including zoom, email and webinars.

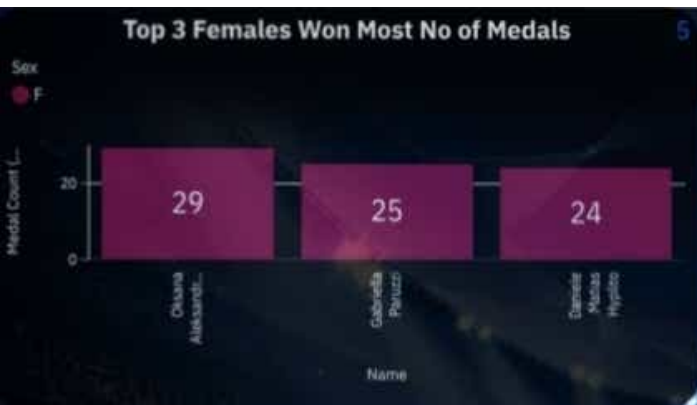

I think virtual internships will look great and resume and will give some valuable work experience. Smartbridge offered everyone who are available to complete an internship to learn skills and gain employability.

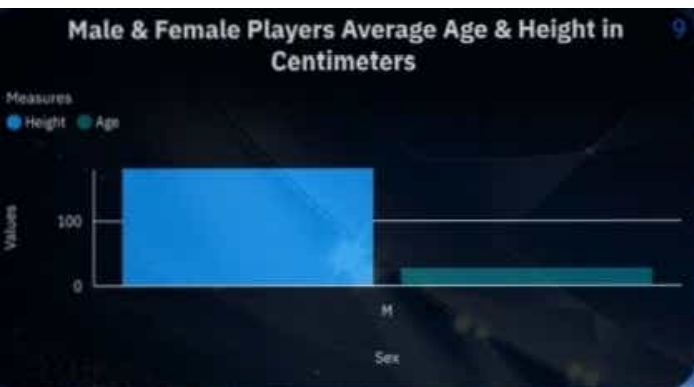

I registered data analytics course which included data cleaning, visualizations, machine learning and algorithms, python tasks one of the best things about the intern.

I fully enjoyed this lectures, he explained every thing in detail and it made easier for me to understand.

at the beginning of the course, I was honestly a bit intimidated by the course but with instructor through teaching style I was able to fully grasp everything he taught.
